Subject: Boeing Plant 2 OA-11 Interim Measure
Technical Memorandum Work Plan
Boeing Plant 2, WAD 00925 6819
RCRA Docket #1092-01-22-3008(h)

Dear Mr. Kowalski:

Boeing is requesting a Toxic Substances Control Act (TSCA) Risk-Based Disposal Approval (RBDA) for proposed additional data collection to support excavation and disposal of soil and inactive stormwater infrastructure that contain detectable concentrations of polychlorinated biphenyls (PCBs). The additional characterization prior to construction proposed in the attached Technical Memorandum Work Plan, which includes collection of soil, concrete, and groundwater samples, will facilitate construction planning, including waste characterization and profiling, and will assist with further delineation of the excavation limits. The proposed additional data collection is anticipated to occur June 13 – 16, 2016; the proposed excavation for OA-11 is scheduled to occur in late summer 2016. A separate RBDA request will be provided at a later date for the excavation and disposal work itself.

The proposed cleanup is being managed as part of the Uplands Corrective Measure at Boeing Plant 2 pursuant to the Administrative Order on Consent (Order; Resource Conservation and Recovery Act [RCRA] Docket No. 1092 01 22 3008(h)) issued to Boeing in 1994 by the U.S. Environmental Protection Agency (USEPA) under authority of RCRA Section 3008(h), as amended (42 USC 6928(h)).

I hereby certify that 40 CFR 761.61(a)(3)(B) required documentation is on site and available for EPA inspection at Boeing Plant 2, 7755 E Marginal Way S., Seattle, Washington 98108. If you have any questions or require additional information please do not hesitate to contact me at the number below or Will Ernst at (206) 662-1752.

Sincerely,

Brian Anderson
